

Real Changes

What's new in helping you look as young as you feel from Dr. Earl H. Parrish and the professional staff of the Parrish Cosmetic & Plastic Surgery Center.

**Enhancing your beauty...
from within!** Fall 2010

Fall Medi-Spa Specials

10% Off BBL Treatments

Now that we are saying goodbye to summer, lets say goodbye to our "summer fun in the sun damage" too! Come in and see Patty, our laser specialist, for BBL treatments. BBL- Broadband Light is perfect for skin conditions associated with aging, active lifestyles, and sun damage. Fine lines, age & sun spots, small facial veins and other skin blemishes can be treated. Your skin will be smoother, more vibrant and will have a more youthful appearance. The procedure is gentle and non-invasive. The fall months are a perfect time for BBL treatments, and it's never too early to start thinking about the holiday season and getting ready for those holiday parties.

CONSULTATIONS ARE COMPLIMENTARY. COME IN AND SEE WHAT WE CAN DO FOR YOU!

Fall is the season of change, so why should we be any different? Some of us are busy moms who just got our kids back in school, some of us are students ourselves and some of us have wanted to make a change for a long time.

Whether you are wanting a healthy glow for the new season or that tummy tuck you've thought about for years, we can help. At the Parrish Cosmetic and Plastic Surgery Center we understand the desire for change, we understand the desire for looking and feeling your best. So no matter what your situation is - lets make this Fall about YOU!

Fall - The Season of Change

OUR PATIENTS SAY IT BEST Our Latest Patient Testimonial

"I wanted to take this opportunity to thank everyone in your office who played a part in helping me through my decision to have elective surgery. For years I have dreamed of breast surgery and am so grateful for having had the surgery."

"Everyone in your office was so kind and caring toward me. I found everyone to be patient and caring. I appreciate each and every one of you for the role you had. I love my results."

"I am truly grateful. Thank you!!!! You are an amazing team - I understand why you were so highly recommended. Thank you from the bottom of my heart."

Debra's Corner Coming Soon!

Starting next month we'll be sending out regular email updates from Debra, our dermal filler specialist, with the latest in dermal filler products, specials and more!

Debra is a graduate of Stanford University School of Medicine and is a Certified Physicians Assistant who has been with our center since 2003. She has been in the plastic surgery field since 1976 and has seen the evolution of non surgical techniques using Botox® and dermal fillers including Restylane®, Perlane®, Juvederm® and Radiesse®.

Debra has been called a true artist in her field and we are proud to have her on our professional team!

Watch for Debra's Corner!

Upcoming Educational Seminars

Sculptra Aesthetic-the new age of anti-age **Wednesday, October 13 at 6:30**

Join us as we discuss Sculptra® Aesthetic - an injectable poly-l-lactic acid that is the fastest growing procedure overall among plastic surgeons. Sculptra® Aesthetic is not a filler but works by stimulating your own collagen, creating smooth, long lasting results. As you age, your body's collagen production decreases, and you may begin to see wrinkles. Sculptra® Aesthetic works to correct shallow to deep facial wrinkles and folds, as it replaces lost collagen, which can help provide a refined, more youthful appearance. Complimentary DVD's are available in our office, pick yours up today!

Skin tightening with Sciton Laser **Monday, November 15 at 6:30**

Join us as we discuss the latest treatment with our Sciton Laser - Skin Tyte. Skin Tyte is a skin tightening procedure utilizing heat energy to smooth out the skin and strengthen its collagen. SkinTyte can effectively treat any area of the body where improvement is desired, giving patients a firmer, more youthful appearance.

Wine and hors d'oeuvres will be served. Seating will be limited. RSVP required. Call to reserve your spot!

Did you know...

The importance of Board Certification...

Most of us know that doctors attend 4 years of medical school after college to earn a medical degree (MD), after which they must pass an exam to be licensed to practice medicine. Each state has its own standards and exams for licensing physicians, and a doctor can be licensed in more than one state.

In order for physicians to specialize in an area of medicine, such as plastic surgery or cardiology, they must further their education with a residency of 3-7 years that focuses exclusively on that specialty. Many specialists go even further to participate in a fellowship after residency, in which they practice under the supervision of older, more experienced physicians in their chosen field. These physicians can then choose to become board certified in their specialty. This means that they have taken specific exams and passed explicit qualifications to be accepted into their specialty.

It may surprise you to know that any licensed medical doctor can perform plastic surgery, whether they are qualified to do so or not. Training and certification are important when choosing a plastic surgeon. Dr. Parrish takes pride in being board certified by the American Board of Plastic Surgery. Get to know your surgeon. Find out if he/she is board certified and in what field he/she holds certification in.
